

SYSTEM BUILD PROPOSAL

Huseyin Ajuz — Client Management & Automation System

This document outlines the full system required to run Huseyin's hair loss consultancy business — from the moment a lead sees a reel on Instagram to the end of their 90-day programme. The goal is to automate as much admin as possible so Huseyin spends time on clinical work, not chasing emails.

THE FULL CLIENT JOURNEY — END TO END

1

Instagram Reel Posted

Huseyin posts a reel. Viewer comments a keyword (e.g. CYSTEINE, PROTECT). ManyChat triggers and collects their name and email automatically.

2

Lead Captured → Google Drive

ManyChat saves the lead's name and email into a Google Sheet or Drive tracker. This becomes the master client database.

3

Welcome Email Sent Automatically

As soon as the lead registers, an automated welcome email goes out from Huseyin's Gmail. No manual action required.

4

Lead Follow-Up Sequence

If the lead does not respond, the system reminds Huseyin to follow up on Day 3, Day 7, and Day 12. After Day 12 the lead is marked cold.

5

Payment Received

Client selects a package and pays. System is notified, client status updates from 'Lead' to 'Active Client'.

6

Consultation Scheduled

System automatically books the initial consultation into Huseyin's calendar based on availability. Client receives confirmation.

7

Programme Tracking Begins

Client record is created: name, phone, email, package, start date, end date, amount paid. Programme milestones are tracked automatically.

8

Automated Check-Ins

System sends reminders to Huseyin at key milestones — blood test pending, week 6 check-in due, end-of-programme review. Monthly hello messages sent to each client based on their timeline.

9

Programme Ends

End-of-programme review triggered. Client offered renewal or upgrade. Record archived.

Confidential — Prepared by Huseyin Ajuz for system development purposes.

THE 3 PACKAGES — WHAT THE SYSTEM MUST TRACK

STANDARD — \$197

Initial consultation call · Blood test results review & analysis ·
Personalised 90-day written guide · Supplement & nutrition plan ·
Hair care routine guide · Mid-programme check-in at week 6

PREMIUM — \$297

Everything in Standard plus: · Direct WhatsApp access to Huseyin ·
End-of-programme review call

VIP — \$497

Everything in Premium plus: · 30-day extended support after programme
ends · Full continued guidance post-programme

CLIENT TRACKER — FIELDS TO RECORD PER CLIENT

Client Info

Full name · Phone number with country code · Email address ·
Country

Programme Info

Package selected (Standard / Premium / VIP) · Amount paid ·
Payment date · Start date · End date

Status

Lead / Awaiting Blood Test / Active / Week 6 Check-In Due / End
Review Due / Extended (VIP) / Completed / Cold Lead

Follow-Up Log

Date of first contact · Day 3 follow-up sent · Day 7 follow-up
sent · Day 12 follow-up sent · Response received Y/N

Notes

Any clinical notes or flags Huseyin adds manually per client

AUTOMATED REMINDERS THE SYSTEM MUST SEND

Lead registered — no response

Remind Huseyin to follow up on Day 3, Day 7, and Day 12. After Day 12
mark as Cold Lead.

Blood test pending

Alert Huseyin that client has not yet submitted blood test results
after X days.

Week 6 check-in due

Remind Huseyin that the mid-programme check-in is due for this client.

End-of-programme review due

Alert when client is approaching their end date — review call to be
booked.

TOOLS ALREADY IN USE

Instagram + ManyChat

Reels drive keyword comments. ManyChat collects name and email automatically and triggers the welcome sequence.

Gmail (mrhus@huseyinacuz.com)

All client emails sent and received here. Welcome emails, follow-ups, and protocol PDFs all go through this account.

Google Drive

All client files stored here under MY PATIENTS folder. Blood tests, protocol PDFs, and notes saved per client.

WhatsApp (+90 536 596 0811)

Primary communication channel for Premium and VIP clients. Also used for lead follow-up.

huseyinajuz.com

Landing page with booking form. Built on Netlify. Collects name, email, phone, package, preferred date and time.

PayPal + International Bank Transfer

Current payment methods. System needs to track payment confirmation and update client status automatically.

DASHBOARD — WHAT HUSEYIN NEEDS TO SEE AT A GLANCE

- Total active clients and which package each is on
- Clients awaiting blood test results
- Clients who have paid but not yet started
- Clients at week 6 — check-in due
- Clients approaching end of programme — review due
- Leads who have not responded — Day 3 / Day 7 / Day 12 status
- Cold leads — no response after Day 12
- Monthly revenue summary

KEY NOTES FOR OMER

Phone numbers without country codes

A recurring problem — leads submit the landing page form without a country code on their phone number. The system should flag this and prompt Huseyin to collect the country code before WhatsApp follow-up is possible.

Welcome email going to spam

Huseyin's welcome emails are currently landing in spam. The system should use a proper sending domain with SPF and DKIM configured to fix deliverability.

Language handling

Confidential — Prepared by Huseyin Ajuz for system development purposes.

Huseyin works with clients in multiple countries. If the client's
